

TES GDS

Instrument Team Ground Data System Reports

Doug Shepard

Jet Propulsion Laboratory
California Institute of Technology

Aura DSWG
October 1, 2007

Overview

- Instrument status
- Current State of Data Production
- Upcoming Releases
- Issues and Other Items

Instrument Status

- The TES instrument is operating normally
 - Global Survey scheduled every other day
 - Special Observations scheduled during 'off' days
- One Hundred Thirty Global Surveys gathered YTD
 - Four Hundred Sixty Global Surveys since launch
- Three Hundred Special Observations gathered YTD
 - SAUNA2, US/Mexico, TC4, WAVES, China/Beijing
 - One Thousand Fifty Special Observations since launch
- Instrument downtime this year:
 - De-ice cycle commanded three times
 - One filter wheel anomaly
- ICS motor current continues to slowly increase; lubricant issue identified prior to launch

Data Production

- Three processing centers
 - SIPS: processes nominal Global Survey and Special Observations
 - SPC: 'special' processing: full filter, larger scale science investigations
 - SCF: supports development and small scale investigations
- SIPS: 260 nodes, 90 TB data storage
- SPC: 40 nodes, 10 TB data storage
- SCF: 40 nodes, 50 TB data storage

Current State of Data Production

- TES GDS software version: 'R10.1', active at SIPS from January '07
 - L1B ESDT Version 2, File version F03_03
 - L2 ESDT Version 3, File version F04_04
- L3 Daily, Monthly Grid and Browse products (initiated July '07)
 - L3 ESDT Version 1, File version F04_04
- L2 Nadir Product Maturity:
 - O3, CO, H2O, ATMT – validated stage 2
 - HDO – validated stage 1
 - CH4 – provisionally validated
- L2 Limb Product Maturity
 - O3, NO2, ATMT – provisionally validated
 - H2O – beta
- Reprocessing completion expected in Nov '07

Level 3 ESDTs

ESDT Short Name	Description of Grid Product
TL3ATD, TL3ATM	Level 3 Atmospheric Temperature;
TL3CH4D, TL3CH4M	Level 3 Methane
TL3COD, TL3COM	Level 3 Carbon Monoxide
TL3H2OD, TL3H2OM	Level 3 Water
TL3HDOD, TL3HDOM	Level 3 Deuterated Water
TL3HNOD, TL3HNOM	Level 3 Nitric Acid
TL3O3D, TL3O3M	Level 3 Ozone
TL3NO2_8, TL3NO2M	Level 3 Nitrogen Dioxide

SIPS R10 Reprocessing

Upcoming Releases

- R10.4 update delivery required by GEOS510
 - Only “forward” processing will use GEOS510 in R10
 - We will implement GEOS510 only when GEOS501 is turned off
- R11 delivery scheduled for March '07
 - L1B, L2 & L3 ESDT Versions to be incremented
 - Reprocess using GEOS510
 - Provide L2 “Supplemental” product files, initial species concentrations from climatology
 - L1B
 - Calibration adjustment to account for apparent control laser frequency drift
 - L2
 - Surface temperature retrievals improved
 - Constraints improved and will lead to less distortion in ozone near tropopause
 - Convergence criteria tightened to make sure we reach best possible solution

Accessing TES data

- Documentation & IDL data readers available from
 - http://eosweb.larc.nasa.gov/PRODOCS/tes/table_tes.html
- IDL readers provided early in each release, and are backward compatible
 - L1B
 - L2
 - L3
- Documentation provided
 - Data Product Specification
 - Level 2 User's Guide
 - Data Quality Statement
 - Data Versioning

Issues & Other Items

- Often need to reorder GMAO data
- Uncertainty in the scheduling of GEOS GMAO 5.1.0
- Future products produced from joint retrievals from multiple instruments
- ASDC listing of holdings provides us with a much improved ability to see what is really at the DAAC
